

# HELP WILDLIFE!

## REPORT DEBRIS INTERACTIONS

The Wildlife and Habitat Impacts Working Group, as part of the Southeast Marine Debris Action Plan, has developed Tangled in Trash: A Reporting Tool for Wildlife. This citizen science project allows anyone in North Carolina, South Carolina, and Georgia to document interactions between animals and marine debris.

### MARINE DEBRIS PREVENTION

Housing this information in one place will allow natural resource agencies to better understand how marine debris affects wildlife populations so they can develop more effective solutions!

### How to Report?

- Go to Tangled in Trash website <https://anecdata.org/projects/view/861> or use QR code above
- Create a new Anecdata account (or login if you already have one)
- Click + New Observation
- Answer questions and submit photos of the animal(s)
- Hit SAVE to submit the data
